

#### Breakdown or breakthrough? The future of anti-doping

Prof Andrea Petroczi & Jake Shelley Kingston University London

2017.12.04.

### Doping is a 'wicked problem'

- Complex & Unpredictable
- Constantly evolving
- Multiple stakeholders and contradictory requirements
- No stopping rule

Perpetual state of 'breakdowns' and no chance for a 'one-off global breakthrough'

### The doping problem

It is a problem because

- 1. clean sport has a different meaning to different stakeholders
  - 1. Conflict between 'clean sport' and 'codified' clean sport'

Anti-doping legitimacy assumes that anti-doping measures are

- 1. Justified ('having shared values and motivations' by all)  $\checkmark$
- 2. Appropriate ('does the job') ?
- 3. Fair ('applied to everyone, evenly and fairly') **X**

Clean sport ≠ Codified clean sport (Spirit of Sport ≠ WADA Code / List of prohibited substances)

'Clean' ATHLETES: "take nothing at all for performance enhancement"

REGULATORS: "take whatever you want as long as it is not prohibited"

#### Solution(s)?

- Ongoing generation of complimentary multiple partial solutions as context evolve
- Athletes have the power focus should be on what prevents doping, involve athletes; being a clean athlete is a strong identity

"we may not have gone where we intended to go, but we have ended up where we needed to be"

> paraphrased from Douglas Adams: The Hitchhiker's Guide to the Galaxy

Anti-Doping: Breakdown or breakthrough?

## Darya Klishina: Last Woman Standing

IAAF ban ARAF from international competitions	Klishina declared eligible under Rule 22.1A(b) to compete as a neutral	Eligibility revoked by IAAF due to 'new evidence'	Appeal upheld by CAS, who deem her eligible to compete internationally	CAS decision is published
13 Nov. 15	9 July 16	10 Aug. 16	15 Aug. 16	17 Aug. 16

# CAS Details: Sworn affidavit by Prof. McLaren

One sample had hallmark scratches indicating tampering + DNA from another female.	One sample had a <b>T/E</b> ratio of 8.5/1	A third sample also had the <b>scratches</b> that indicated <b>cap removal</b> and tampering
IAAF expert rejected explanation regarding the high T level	Relevant question is <b>not</b> whether athlete was affected by the <b>Russian System</b>	Fulfilled the criteria of the Rule - subject to a compliant system

"The situation with Darya Klishina appears to be cynical mockery of the Russian sportswoman by the IAAF" **Russian Olympic Committee President Alexander Zhukov** 

WADA vs. Cheats

= Coyote vs. Road Runner
